LIVE LIKE YOU

Live wisely, live healthily, live happily, live together, live life. We are often told how to live. And for all those who don't want to listen anymore, there is now something to see: the new ŠKODA OCTAVIA. But not only because of its very impressive new design. The new OCTAVIA is a car for everything that comes into your head – or doesn't. Be it children, hobbies, style, speed or even cosiness. Equipped with lots of space, the latest technology and safety assistants as well as lots of clever ideas, you can concentrate on what counts the most – to live like you.

CASTELLANA

ET CALLE & DE CALLE & HERMOSILLA

> Octavia Caffe

AOUP

That's Simply Clever. That's ŠKODA.

Octavi

EMOTIONS IN MOTION

The OCTAVIA embodies the design trend of the ŠKODA brand: a fusion of aesthetics, safety and practicality. Whether you see the car as a whole or step closer and explore its unique features, the OCTAVIA radiates with

the harmony of functionality and emotion.

ŠKODA BRAND

As a badge of honour, the ŠKODA name proudly embraces the 5th door.

24ST 5080

STYLE AND FUNCTIONALITY

The car features dynamic lines, balanced proportions and distinctive features such as the front grille and headlights in the shape of an arrow. The fog lamps are also unmistakable. In addition to their utility functions, they play a key design role.

10

PANORAMIC SUNROOF

Let more light and fresh air in. The electrically-adjustable panoramic sunroof of the combi version, made from tinted glass, allows you to create a large open space above the front seats.

ROOF RAILINGS

and follow its clear aerodynamic shape.

TIME TO SHINE

Advanced technology is made beautiful in the light design of the OCTAVIA. The car features full LED Matrix headlights, which offer greater road lighting and a higher degree of safety.

HEADLIGHTS AND FOG LAMPS

In exterior lights, the unique ŠKODA Crystal design is combined with an innovative solution. The top-end option comes with matrix technology. Using a windscreen camera, the full LED Matrix headlights can detect a car in front of you or in oncoming traffic. Based on this, the high beam adjusts itself incrementally. This ensures you get the best view without blinding other drivers. The headlights also feature a low beam function (Adaptive Frontlight System modes) created by a projection module in combination with a side light reflector. The system adapts the lighting to the steering wheel position. The excellent functionality of the fog lamps is powered by LED technology.

REAR LIGHTS

The full LED rear lights are fitted with animated turn indicators, which not only reveal where the driver is about to turn, but also add dynamism to the car. The rear lights also feature decorative elements, typical for the ŠKODA family. While the C-shaped illumination is updated with a modern twist, crystalline elements reference the Czech crystal glass-making tradition.

WELCOME HOME

The interior welcomes you with a perfect harmony of materials and colours. The dashboard refers to the car's exterior lines and emphasises the feeling of generous space. The infotainment display positioned high up on the dashboard, in the driver's immediate field of view, creates a pleasant symmetry. The attractive décor, chrome details and LED ambient lighting enhance the powerful impression.

COMFORT AND SPACE

ŠKODA's

craftsmanship is confidently presented inside. Surrounded by high-quality materials, you'll enjoy the ride no matter where you sit. The exceptionally spacious interior offers lots of legroom and headroom for the whole crew.

STYLE AND FUNCTIONALITY

The car features a newly designed 2-spoke steering wheel. The top-end option comes with multifunctional leather steering wheel, which not only allows you to control the radio, phone and DSG, but also offers a heating function.

DECORATIVE PAD

The new OCTAVIA dashboard can be decorated with Suedia (shown) or fabric pad with stitching, which brings a unique style to the interior.

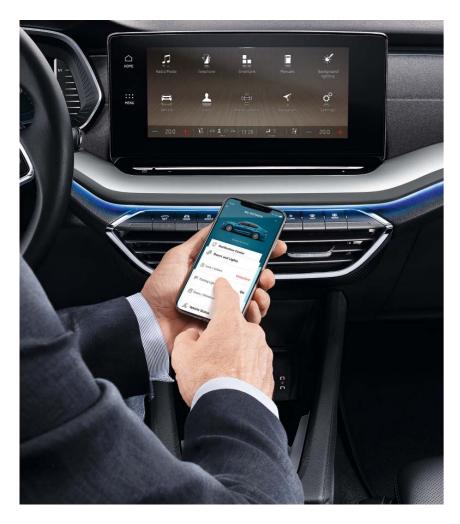

ŠKODA CONNECT: TAKE THE ONLINE WORLD WITH YOU

To be online fully and permanently means not only having access to entertainment and information, but also possible assistance while on the move. ŠKODA Connect is your gateway to a world of unlimited communication possibilities.

ONLINE TRAFFIC INFORMATION

Up-to-date information gives you a perfect overview of every trip. It also enables you to react to new developments, such as roadworks, accidents and traffic jams. Also, local hazard information will warn you in case any inconvenience occurs on your way, such as difficult conditions or limited visibility.

ŠKODA CONNECT

This offer includes two types of service. Infotainment Online delivers real-time information about traffic and more, Care Connect focuses on help and safety, enabling remote access and control of the vehicle. It also offers assistance for any situation that needs it.

ONLINE AUXILIARY HEATER

Control your car's auxiliary heating from anywhere in the world via the ŠKODA Connect Lock and Unlock your vehicle via ŠKODA App for your smartphone. When you've been on a trip and you're about to set off home, for example, activate your heater beforehand to warm up the car. Besides activation itself. you can also set a departure time and choose between heating and ventilation.

LOCK & UNLOCK

This feature allows you to comfortably Connect App no matter where you are. For example, in case you forgot to lock your car, you can easily do so with your smartphone from anywhere.

FUNCTIONS ON DEMAND

Functions on Demand technology allows you to purchase and activate vehicle and infotainment functions after vehicle production. This means you can change your mind which functions you want to use in the vehicle even after you bought it. In addition, you can upgrade the vehicle if you bought it used.

ONLINE PERSONALIZATION

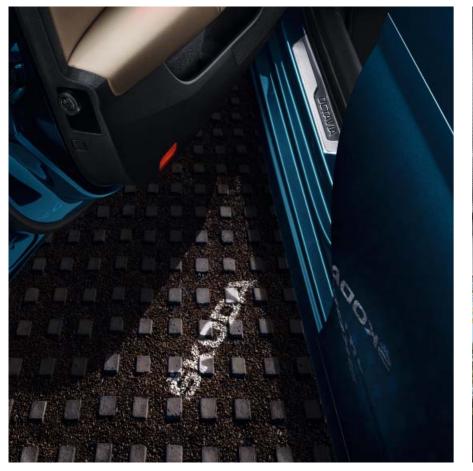

You will appreciate this service especially if your car is driven by multiple users. Set your comfortable seat position, digital dashboard layout or air conditioning parameters - the settings will be synchronized with your ŠKODA ID account. Therefore next time you log in to your car after it was driven by someone else, you can comfortably set off with your preferred settings. With online personalization, you can set your preferred settings not only in your car, but in any ŠKODA vehicle that allows it.

SIMPLY

GENIUS IS IN THE DETAILS

Simply Clever solutions make your life easier. Whether it's practical storage compartments or an ingenious towbar, these thoughtful features take the headache out of travelling.

SUNGLASSES COMPARTMENT

This practical compartment located above the interior rear-view mirror is within the driver's and front passenger's reach. (Not available in combination with panoramic sunroof.)

PROTECTIVE WINDOW STRIPS

The protective window strips effectively prevent dirt building up in the space between the windscreen and body of the car.

WELCOME LOGO

The LEDs located on the underside of the front doors, creating the ŠKODA inscription, illuminate the entry area.

ADBLUE TANK FOR DIESEL ENGINE

Thanks to the tank neck size, you can use any AdBlue nozzle at the petrol station.

LIQUID RESERVOIR

You will never spill a single drop when refilling the washer fluid. The liquid reservoir is not only easily accessible, but also has an integrated funnel.

DOUBLE POCKET

Organise your things even better with double pockets on the back of the front seats. Hide your notebook or laptop into the bigger pocket and your mobile phone into the smaller one.

JUMBO BOX AND DRINK HOLDERS

Small electronic devices can be safely stored in the Jumbo box in the front armrest. And when the air conditioning is on, you can even cool your snacks. For your drinks, there are drink holders with Easy Open function on the centre console.

FRONT DOOR COMPARTMENTS

REMOTE FOLDING SEATS

You will find a 1.5 l bottle holder in a spacious compartment in the front door. This is also where you can place a removable waste basket.

BRUSH / UMBRELLA STORAGE COMPARTMENT

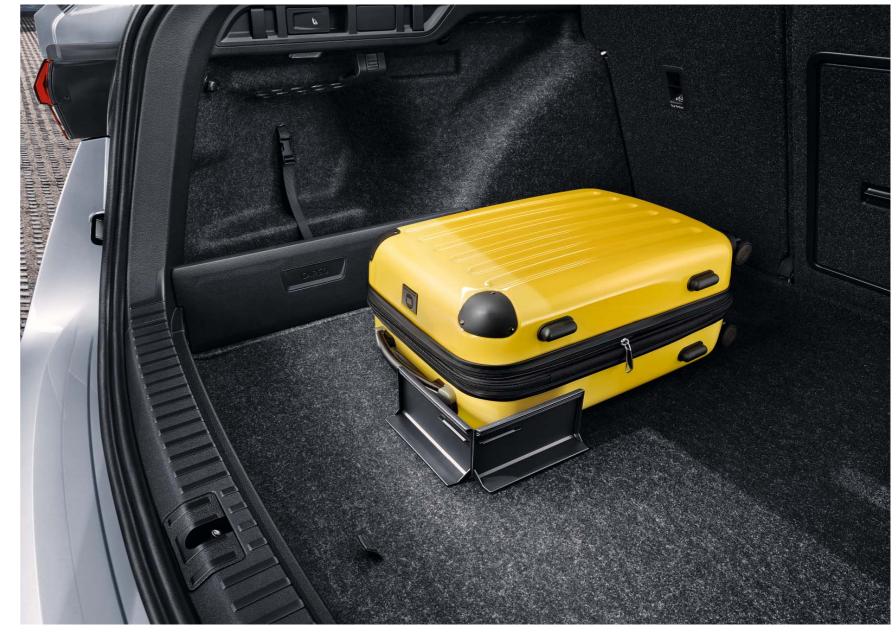

An ingenious compartment fitted inside the driver's door is designed to let water drain away from the car. This compartment can be used to hold a snow brush or an original ŠKODA umbrella.

TOWING DEVICE

The car has a foldable towing device with electric release. The switch is in the luggage compartment.

CARGO ELEMENTS

To avoid any undesired movement of luggage while driving, these two plastic cargo elements with a Velcro fastener are ideal. They can be stowed away in the compartments behind the rear wheel arches when not in use.

The rear seats can be folded using a remote release button located in the luggage compartment, which will make loading the car even more effortless.

COMPARIMENT

XXLUGGAGE COMPARTMENT

Your XXL attitude requires XXL capacity. But it wouldn't be a true ŠKODA if it wasn't accompanied by XXL practicality. You can find many smart features inside the OCTAVIA's boot, which will help you load all your stuff, keep the car tidy and prevent things from moving around.

CAPACITY

As always, the luggage compartment is generous. The combi version offers 640 litres and 1,700 litres after folding down the rear seats.

42

NET PROGRAMME

One horizontal and two vertical nets increase the flexibility of the luggage space while firmly securing objects.

DOUBLE FLOOR

The double floor (exclusively for the combi version) provides easier luggage handling or a discrete storage place, with the bottom of the luggage compartment positioned at loading edge level.

CAPACITY

The luggage compartment of the liftback version with a basic volume of 600 litres can be extended up to 1,555 litres by folding the rear seats down.

You can use the carpet with the elegant fabric side up when not transporting anything that might make your car dirty and can easily turn it over to utilise the washable rubber side when required.

NET PROGRAMME

clearly see where you put everything.

The set including one horizontal and two vertical nets will

reliably prevent your things moving around. Plus you will

ŗ

HIGH-TECH, HIGH COMFORT

Sometimes it's good to let yourself be spoiled. While driving, for example. Plenty of thoughtful technologies and smart features are here at your command, ready to maximise your comfort and driving pleasure. Just put your foot down.

ELECTRICALLY-CONTROLLED 5TH DOOR AND VIRTUAL PEDAL

The electrically-controlled 5th door opens and closes at the mere touch of the button on the remote control, central panel or directly on the 5th door. You can also adjust the upper door position to suit your needs. The door can be equipped with a virtual pedal enabling contact-free access.

MULTIMEDIA 10" DISPLAY

Attractive design is accompanied by perfect functionality. The multimedia 10" display enables touch slider operation, where you don't need to touch the screen while adjusting the volume or zooming the navigation. Below the display, it also provides an ergonomic wrist rest when operating the screen.

COLUMBUS 10" INFOTAINMENT

The top-class Columbus infotainment with 3D navigation system can provide a different zoom for infotainment display and for the Virtual Cockpit, which is a great tool for displaying maps, for example. In addition to the touch or gesture control, you can operate the device via Laura, the digital assistant. This new enhanced and online-based voice control system can answer queries about a wide variety of topics and follows commands. For example, it will start navigation to a desired destination, find a favourite piece of music or take dictation for an SMS. The Web radio feature, which also comes as a bundle in combination with the Columbus infotainment system, allows you to expand the usual portfolio of conventional stations with your other favourite channels, podcasts, and news. You can tune in and listen in high quality to any radio streaming service in an area covered by the Internet. The DAB (Digital Audio Broadcast) function is also available via the Columbus infotainment system.

ASSIST

the stand of the second

AMBIENT LIGHTING

Experience ultimate comfort thanks to the interior lights. LED ambient lighting, which can offer you many amazing colour options, includes lights running along the inside of the car, foot area illumination front and rear, door handle lighting front and rear, and luggage compartment lighting.

CANTON SOUND SYSTEM

Enjoy absolute sound clarity, whether it's music or the spoken word, from the Canton Sound System with twelve speakers, including a central speaker and subwoofer in the luggage compartment.

MULTIMEDIA HOLDER

The multimedia holder enables you to securely fit a tablet to the front seat headrest.

VIRTUAL COCKPIT / HEAD-UP DISPLAY

The Virtual Cockpit can display onboard computer specifications in combination with other information such as navigation, for example. The head-up display shows the driving data in such a way that the driver's eyes don't have to refocus, thereby significantly reducing the possibility of distraction.

Comfort

You will feel much more confident behind the steering wheel with four cameras that sense the space around the entire vehicle. They are located in the front grill, external side-view mirrors and on the handle of the 5th door. The picture is transmitted in real time to the infotainment display so you can react quicker to whatever comes your way.

ERGO FRONT SEATS

Maximum comfort for the driver and front passenger is ensured by the electrically-adjustable Ergo front seats which also feature (among other functions) cushion depth adjustment.

ROLLER BLINDS

Mechanical roller blinds for the rear side windows, plus for the 5th door glass in the liftback version, significantly increase passenger comfort in the rear seats on sunny days.

SLEEP PACKAGE

Rear passengers will sleep sweetly through a long journey thanks to the Sleep Package (exclusively for the combi version). It includes variable headrests for the outer seats for a comfortably supported head posture while sleeping, roller blinds for the rear side windows, SunSet lamination and one blanket elegantly wrapped in a grey case.

MASSAGE FUNCTION

The electrically-adjustable Ergo front seats can also offer massage function. This superior level of comfort is always accompanied by front seat ventilation and heating functions as well as upholstery in perforated leather.

PANORAMIC SUNROOF CONTROL / USB

Open or close the panoramic sunroof easily by touching the control in the roof panel above your head. Here you can also find an additional USB-C slot which is ideal for charging devices mounted on the windscreen.

READING LIGHTS WITH INTENSITY CONTROL

You can easily adjust the light intensity by holding your hand under the reading lights.

PHONE BOX / USB

The phone box creates an amplified signal for your mobile device and, at the same time wirelessly charges your phone while driving. This compartment is not only easily accessible but is also suitable for large display devices. Two USB-C data ports located in the centre console allow you to easily connect and pair your external devices with the infotainment system, without any need for dongles or adapters.

ELECTROMECHANICAL PARKING BRAKE

The new OCTAVIA is fitted with an electromechanical parking brake (as standard across all car versions) that has replaced the usual mechanical handbrake. The electromechanical parking brake acts on the rear wheels. It can be manually activated/deactivated by the button located on the centre console between the front seats.

SHIFT BY WIRE

As the first car of the ŠKODA brand, the OCTAVIA comes with "by wire" technology designed for maximum comfort in vehicles equipped with automatic transmission. The DSG shift by wire is controlled by a shift lever in a minimalist design integrated in the centre console.

KESSY

With the new version of the KESSY (Keyless Entry, Start and exit System) all doors can be used to unlock or lock the car.

COMFORT IN THE BACK

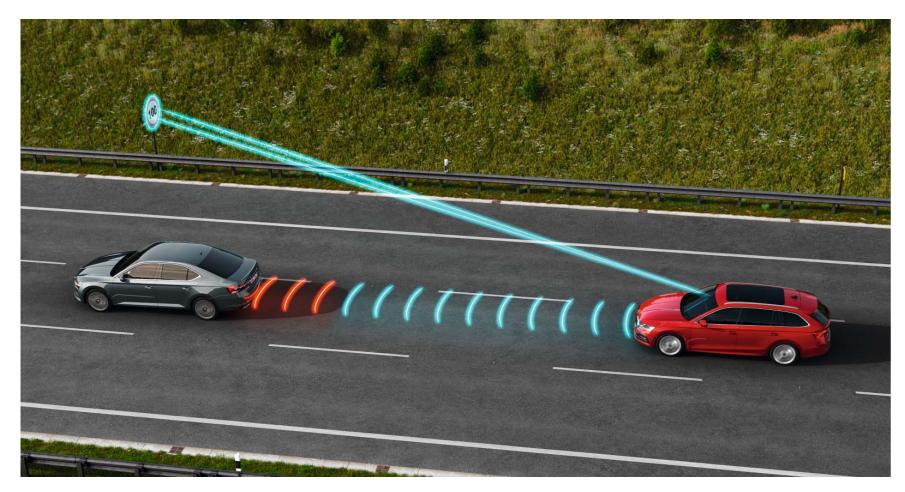

Comfort

On the rear part of the Jumbo Box you will find two USB-C slots, enabling mobile phone charging. In the car equipped with 3-zone Climatronic air conditioning, you will also find the control for the rear seat zone here.

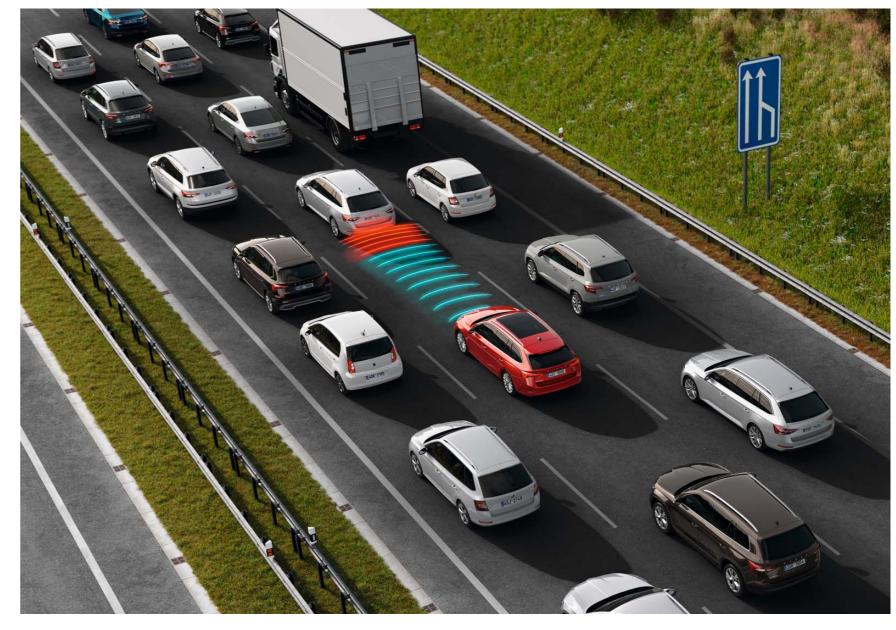

TRAVEL ASSIST

The Travel Assist system as well as its higher version combine the functions of several assistants and ensure that you feel safe and comfortable, no matter where you drive. For maximum safety, the system must be constantly monitored by the driver. That's why a capacitive steering wheel detects the driver's tactility, providing an interactive interface to the system. If the driver is not engaged in driving, this behavior is detected by the capacitive steering wheel.

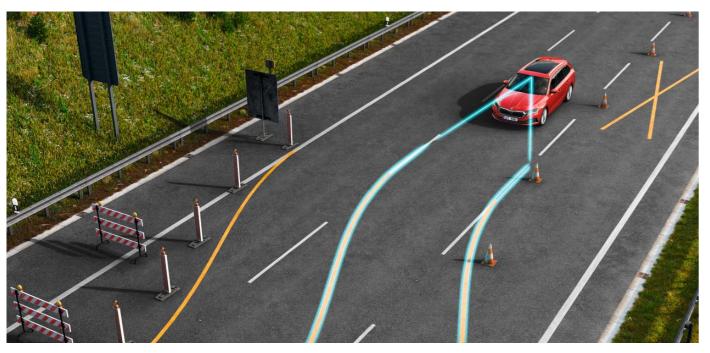

PREDICTIVE CRUISE CONTROL

Using a radar device, camera equipped with traffic sign recognition, GPS technology and detailed information from the road map, PCC can predict driving conditions for the next 1 - 2 km. As a result, the system can automatically adjust the cruise speed when necessary – typically before a turn or roundabout, or when entering an area with a reduced speed limit. PCC increases driver comfort and driver safety while also reducing fuel consumption and CO₂ emissions.

TRAFFIC JAM ASSIST / FOLLOW DRIVE

This function is designed to facilitate driving in traffic jams. By controlling the engine, brakes, and steering, it makes the vehicle pull away, brake, and turn to copy the movement of the surrounding vehicles (at speeds of up to 60 km/h). If lanes are not detected at speeds of up to 30 km/h, or only one lane (line) is detected at speeds of up to 60 km/h, the Follow Drive system follows the trajectory of the vehicle in front of you until lane markings are available again.

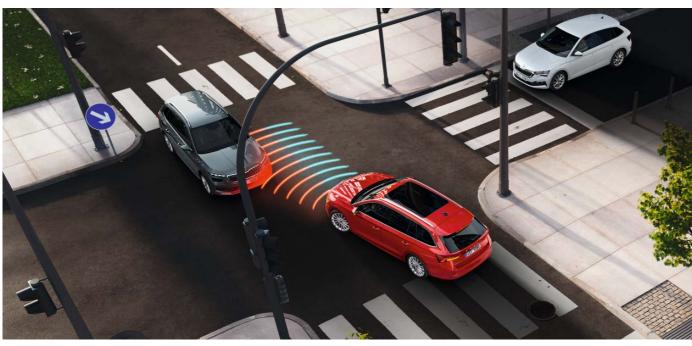

LANE ASSIST+

Operating at speeds above 60 km/h, Lane Assist+ can help to keep the car in the middle of correct lane. This system can also take control of the car in the event of lane changes during roadworks.

EMERGENCY ASSIST

Emergency Assist reduces the risk of an incident in the event of the driver's sudden health collapse, for example, by safely stopping the car and turning on the warning lights.

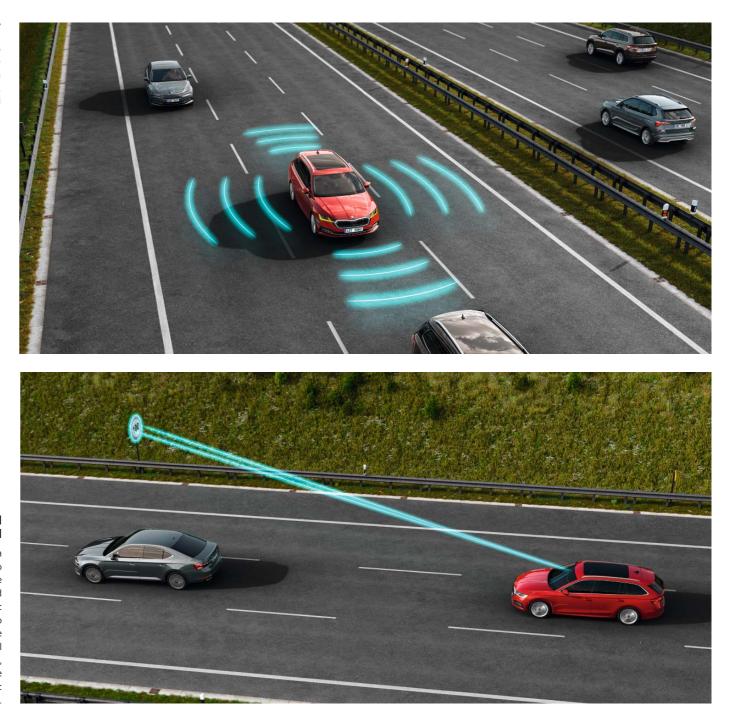

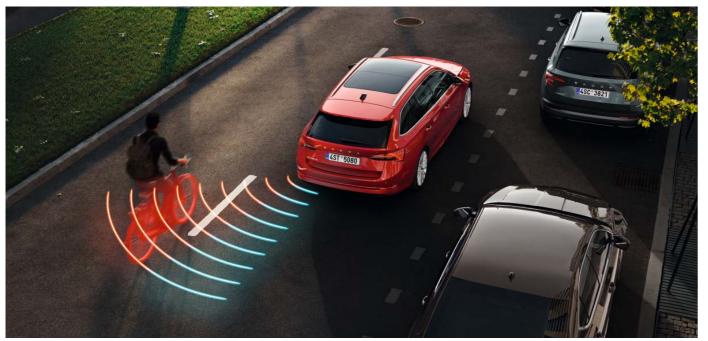

TURN ASSIST* / COLLISION AVOIDANCE ASSIST

The Turn Assist monitors opposing traffic when turning left at low speeds between 2 - 15 km/h. In critical situations, it can stop the vehicle and turns on the warning lights. The Collision Avoidance Assist supports the driver by actively increasing the steering moment in the event of an impending collision with a pedestrian, cyclist, or another vehicle – ideally preventing the accident with a controlled evasive manoeuvre.

TRAFFIC SIGN RECOGNITION

The system uses the camera in the rear-view mirror to scan the traffic signs on the current stretch of road and notify the driver of traffic signs. The system is able to identify signs on both the left and right sides, as well as above the road. Moreover, it is able to identify variable traffic signs too (electronic information boards).

SIDE ASSIST

Using radar sensors in the rear bumper, Side Assist (which can detect other vehicles and harder to see objects like cyclists up to 70 m away) monitors the areas behind and beside your car. Based on the distance and speed of the surrounding vehicles, it decides whether or not it should warn the driver.

PARK ASSIST

Minimise the hassle of parking in tight spots with Park Assist. It automatically selects an appropriate parking place in a row of parallel or perpendicularly parked vehicles.

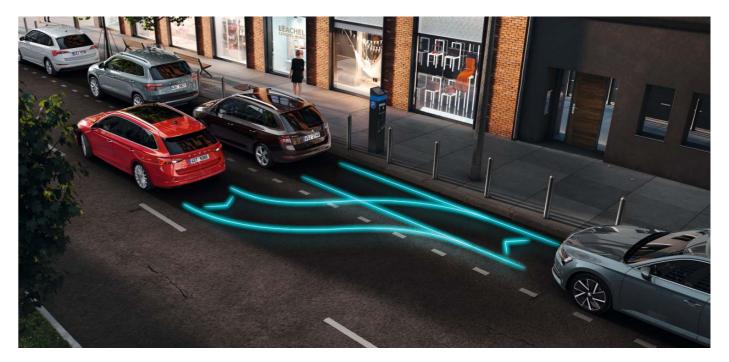

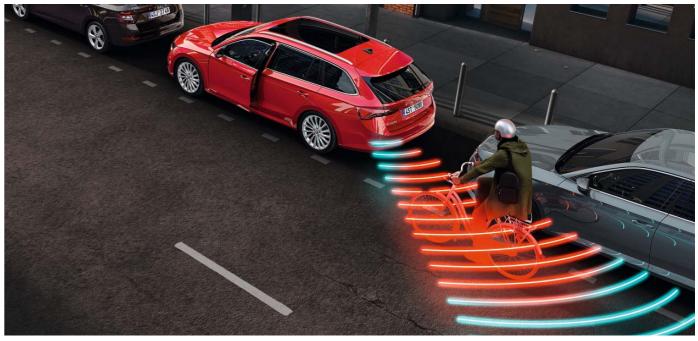

REAR TRAFFIC ALERT

The system warns the driver of rear traffic as they pull away from a row of perpendicularly parked vehicles (visually on the infotainment display/ onboard computer display or acoustically), or, if the case so requires, intervenes proactively, i.e., stops the car.

DOOR OPENING WARNING

When you stop your car and open the door (to get out), the system can detect other road users, such as vehicles, cyclists, runners, pedestrians, etc. up to a distance of 35 m. If it detects an approaching object, it warns the crew in the front and rear, both visually and audibly, about getting out of the vehicle.

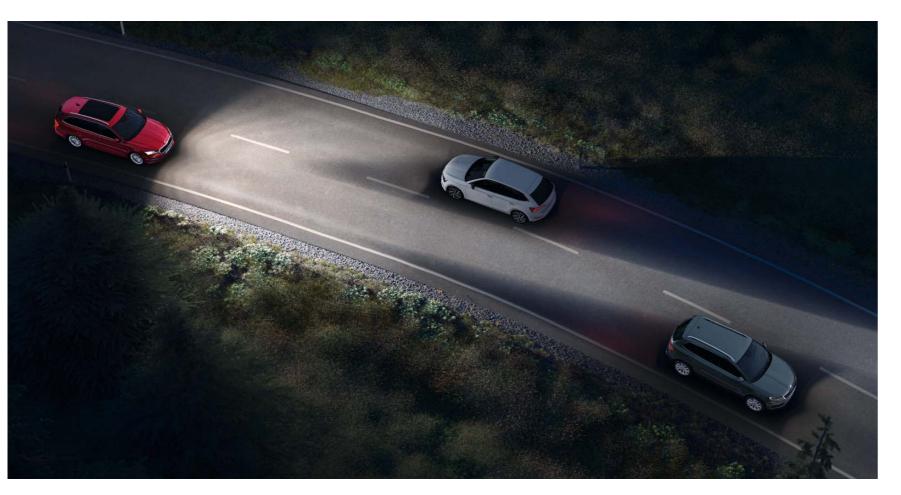

The Side Assist, Rear Traffic Alert, Park Assist, and Door Opening Warning come as part of the Travel Assist higher version.

ADDITIONAL EXPERTS ON BOARD

You can encounter various things on the road. To ensure that the car is ready to handle all situations that may occur on route, additional assistants with multiple functions are on hand to help or fill in for the driver.

CREW PROTECT ASSIST

This assistance system provides increased protection for front-seat passengers in critical situations that could lead to a crash or overturning by closing the side windows to leave only a 5 cm gap, shutting the roof window, and tightening seatbelts.

MATRIX BEAM FUNCTION

The full LED Matrix headlights feature matrix beam function. This allows you to use the high beams continuously, without blinding other drivers. Using a windscreen camera, the matrix beam function responds to the traffic situation and turns off only some segments of the light. Other segments are turned on and illuminate the road. The matrix beam function also uses information from the navigation system. Thanks to it, the high beams will only turn on when you are out of a built-up area.

MULTI-COLLISION BRAKE

In case of an accident, the Multi-Collision Brake starts braking to prevent further uncontrolled movement of the vehicle, thus reducing the likelihood of further collisions.

SAFE HAPPENS

In extreme situations, where the driver cannot actively influence the outcome, the car's passive safety elements take over – like the airbags. You can equip your car with up to ten of them.

FRONT DRIVER AND PASSENGER AIRBAGS

While the driver airbag is enclosed in the steering wheel, the passenger airbag is located in the dashboard. If needed, this can be deactivated when a child seat is installed on the front seat.

HEAD AIRBAGS

Upon activation, head airbags create a wall protecting the front and rear occupants against head injury

Safetv

FRONT AND REAR SIDE AIRBAGS

These four airbags protect the pelvis and chest of the driver and other passengers in the event of a side collision.

KNEE AIRBAG

This airbag, which is located under the steering wheel column, protects the driver's knees and shins.

POWER TO THE PEOPLE

Under the bonnet, you will always find the power that fits your needs without compromising on the environment. The driving performance and fuel efficiency are further improved by the excellent aerodynamics of the car. With a drag resistance coefficient from 0.24, the OCTAVIA sets a new benchmark in its class.

ENGINES

The range of powerful TSI and TDI engines reflects our continuous effort to reduce CO₂ emission levels. That's why we also offer the new Evo TDI engines. The version equipped with the new manual 6-speed transmission can achieve a combined fuel consumption of 3.5 l/100 km at a CO₂ emission level of just 91 g/km. Thanks to the Twin-Dosing* technology, the new engines produce up to 80% less NO_x compared to the previous generation. Our range also includes an iV engine with plug-in hybrid technology (PHEV) and mild hybrid version (MHEV). One of the interesting options on offer is the G-TEC version powered by CNG.

DYNAMIC CHASSIS CONTROL

Enjoy the high performance of your car in maximum comfort and safety. The Dynamic Chassis Control (DCC) continuously evaluates and responds to various driving situations (braking, acceleration, turning), adapting the damping and steering characteristics. As part of the infotainment menu, it allows you to select one of five modes according to your specific requirements: Eco, Comfort, Normal, Sport or Individual. Five basic DCC modes allow you to make even more sensitive settings. There are fifteen options available including "supersport" for example.

POWER UP YOUR POSSIBILITIES

Ш

111

A REAL PROPERTY AND A REAL

The new ŠKODA OCTAVIA iV offers the dynamism and efficiency of an electric engine for day to day urban driving and a 1.4 TSI engine for any trips outside the city. Always equipped with the Virtual Cockpit, the car can satisfy even the most diverse demands on exterior appearance, interior comfort, technology and connectivity, available in Ambition, Style and even in a unique RS version. Choose the one that fits you and relax into your seat.

INNOVATIVE FROM THE INSIDE OUT

ENGINES AND CHARGING

The 1.4 TSI petrol engine offers 110 kW, the electric motor generates 85 kW and the full system power is 150 kW. During a purely electrical drive, the eSound acoustic system is activated, alerting pedestrians that a car is coming. The system is operating both when driving forward (at speeds of up to 25 km/h) and when reversing (up to 10 km/h). The battery with a capacity of 13 kWh is located under the floor in the back of the car and powers you for an up to 60 km drive (based on WLTP measurements). When charging at home and connected to a conventional electrical grid, the battery (if completely empty) will be fully recharged within five hours. The charging time can be shortened to three hours and thirty-three minutes with a wall box or at a charging station that supports fast charging.

INFOTAINMENT

The 10" Infotainment (Columbus navigation system shown) allows you to check the battery status, set up a purely electrical drive, or choose a drive with full system power, for example.

FOR YOUR EVERYDAY RACES

RS, those two magical letters set your heart racing. The new ŠKODA OCTAVIA RS instantly pumps adrenaline into your blood. With up to 245 horsepower under the bonnet, it will be an exciting drive – not just for you. This car also offers great safety, so don't hesitate to invite all the family in. Choose between a 180 kW TSI engine, 147 kW TDI engine or an iV with a full power of 180 kW and live to the fullest every day. The OCTAVIA RS will keep pace with you.

BOLD NEVER GOES OUT OF STYLE

Exclusive meets sporty. The OCTAVIA's emotional design sets a daring tone with its RS version, both on the outside and in. Combine the timeless elegance with specific dynamic features supported by the lower chassis and get a car with attitude.

EXTERIOR DESIGN

The car features bumpers in RS design and glossy black elements such as exterior side-view mirror caps, strips around the side windows, front grille frame, and air curtain framing darkened fog lamps. The RS badge on the grille is a nod to the famous racing tradition of ŠKODA cars. The dynamic appearance of the exterior is enhanced by the 18" black or optional 19" anthracite (shown) alloy wheels. The red brake callipers emphasize the sporty character of the vehicle.

INTERIOR DESIGN

The interior is equipped, among other things, with a multifunctional leather sports steering wheel with RS logo, Virtual Cockpit including Sport view (specific to the RS version), front sports seats, and pedal covers in alloy design. The upholstery in black fabric or optional Alcantara®/leather/ leatherette upholstery (shown) always comes in combination with Alcantara® pad with stitching on the dashboard and Carbon décor.

NATURE WILL WELCOME IT. **SO WILL YOUR WALLET**

The OCTAVIA also comes with a greener engine version. Driven by compressed natural gas, the ŠKODA OCTAVIA G-TEC (available in Ambition and Style equipment level) is not only eco- and budget-friendly. It also offers a quieter and smoother engine. Don't compromise between the environment and performance.

CNG AND PETROL SWITCHING

Switching between the two fuel systems is automatic. The engine is started using CNG and then continues in CNG mode. Should the CNG run out, the car will automatically switch to petrol mode.

92

ENGINE AND TANKS

The standard equipment of the Active version includes external side-view mirrors (electrically-adjustable) and door handles in body colour, tinted windows, LED headlights including LED daytime running lights, LED rear lights, KESSY GO (Keyless Start System), remote-control central locking, electrically-controlled front and rear windows, air conditioning, infotainment Swing 8", two USB-C slots, sunglasses compartment, and more.

PROTECTIVE FOIL FOR REAR BUMPER

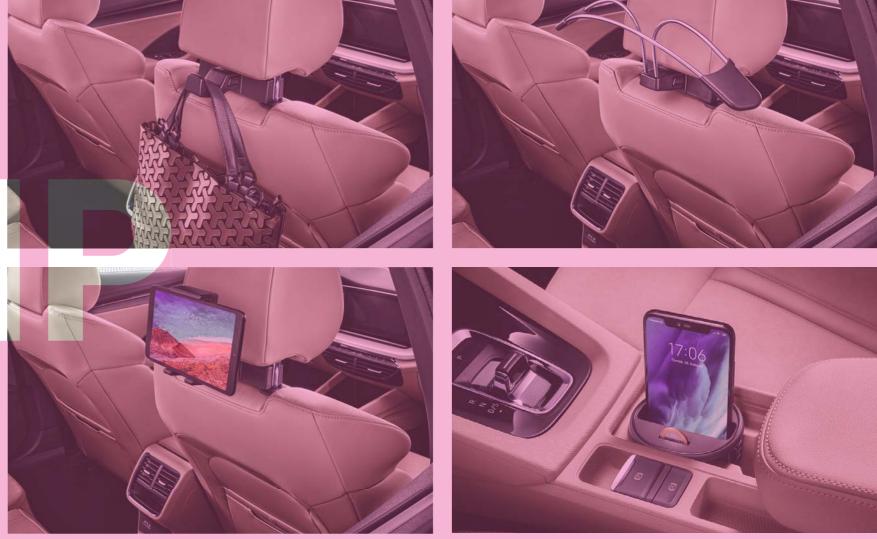

You can protect the loading edge of your rear bumper with a smart strip of transparent film made of highquality polyurethane. This PU material is highly resistant to scratches or rupture, thus preventing mechanical damage to the loading edge and bumper when loading or unloading transported items.

STAINLESS STEEL LOADING EDGE PROTECTION

When loading and unloading cargo, there's always a risk of accidentally damaging the rear bumper. The solution is a simple protective moulding made of high-grade stainless steel. It is durable and the stainless steel design will complement the sporty look of your vehicle.

SMART HOLDER – HOOK

SMART HOLDER - MULTIMEDIA HOLDER

The holder for an external device, which can also be mounted on the front seat headrests, will definitely be appreciated by the rear seat passengers.

SMART HOLDER – CLOTHES HANGER

Handbags and backpacks don't have to take up space on the back seats. Hang them from the smart holder hook that is fixed to the front headrests.

The clothes hanger, which can be mounted on the front seat headrests, is an

extremely practical accessory, especially for those who travel to work wearing a suit.

MULTIMEDIA HOLDER

External appliances can be transported safely in the multimedia holder located in the drink holder in the central console.

PLASTIC BOOT DISH

MULTIFUNCTIONAL POCKET

If you often carry things that might dirty the luggage compartment, the plastic boot dish, which can be easily removed and washed, is the perfect solution. The dish can be equipped with an aluminium partition, which enables you to split the space according to your needs.

NETTING SYSTEM GREY

One horizontal and three vertical nets increase the flexibility of the luggage space while firmly securing objects.

BOOT STORAGE SPACE BAG

Items that are usually kept in the luggage compartment and are not taken out often can be conveniently stored and secured in this practical bag.

DOOR SILL COVERS WITH BACKLIGHT

REAR SEAT PROTECTION

The practical cover prevents the interior of your car from getting dirty or damaged. Its size can be changed to cover only half of the rear seat.

This practical multifunctional pocket is designed for stowing items of clothing and long, lightweight objects that do not have sharp edges. It enables you to cleverly use the available space in the boot.

Side door sill covers with backlight are a decorative accessory for your vehicle. They come in a two-piece set with a Simply Clever battery solution.

OCTAVIA LED LOGO PROJECTOR

The LEDs located on the underside of the front doors project the OCTAVIA inscription – illuminating the entry area.

DECORATIVE DOOR SILL COVERS WITH **ALUMINIUM INSERT**

Four-piece decorative door sill covers with aluminium inserts are an accessory that can be used to enhance your vehicle's aesthetics. They also protect the paintwork around the door sills from dirt.

ALUMINIUM DECORATIVE **DOOR SILL COVERS**

Four-piece aluminium side door sill covers with OCTAVIA inscription, which perfectly follow the contours of the vehicle, are an original feature with aesthetic as well as practical functions.

LOCKABLE SKI OR SNOWBOARD RACK

The lockable ski or snowboard rack is a safe and secure solution for transporting skis or snowboards on the roof of your car.

LOCKABLE BICYCLE RACK

You can securely attach the lockable bicycle rack for carbon/aluminium frame to the basic roof rack.

BICYCLE CARRIER FOR THE TRAILER COUPLING*

The bicycle carrier for tow bars is the ideal solution for vehicles equipped with a tow bar and enables hassle-free and convenient handling of your bicycles. Its elegant style and solid design complement the look of ŠKODA vehicles perfectly.

LOCKABLE ROOF BOX

The lockable box with capacity for up to five pairs of skis or four snowboards in ŠKODA exclusive design features an aerodynamically optimised shape with lowered bottom, which has a positive effect on driving stability, fuel consumption, and limits vibrations. With a 400 litre capacity, you can store more than just winter equipment in the roof box.

REAR PARKING SENSORS

The parking sensors are the simple solution for correct parking. They reduce the risk of colliding with objects that are out of the driver's line of sight but are still within the monitored area.

CETAVIA (

PRESTIGE TEXTILE FOOT MATS

These foot mats add a cosy touch to your vehicle interior and reduce the noise level inside, thereby increasing the comfort of the vehicle occupants when travelling.

ALL-WEATHER PROTECTION MATS

Thanks to their practical and clever design and material, they perfectly cover and protect the footwell floor from mud, dirt and water – giving you peace of mind when taking your vehicle on a field trip.

Craly A

PRESTIGE TEXTILE FOOT MATS WITH GREY STITCHING

They aesthetically complement the modern interior design and outline the footwell contours.

1

WHEEL CARE AND STYLE PACK

Car wheels are like shoes. No matter whether the "shoes" of your ŠKODA are stylish, sporty or purely functional, our WHEEL CARE & STYLE PACK (wheel covers, valve caps, safety bolts) offers a multitude of items which will make your wheels even more attractive and totally unique!

18" PERSEUS silver brushed alloy wheels 7.5J x 18" ET48 for 225/45 R18 tyre

18" PERSEUS anthracite brushed alloy wheels 7.5J x 18" ET48 for 225/45 R18 tyre

18" VEGA black metallic brushed alloy wheels 7.5J x 18" ET48 for 225/45 R18 tyre

17" PULSAR black metallic brushed alloy wheels 7J x 17" ET46 for 205/55 R17 tyre

17" ROTARE silver alloy wheels 7J x 17" ET46 for 205/55 R17 tyre

16" VELORUM silver alloy wheels 6.5J x 16" ET46 for 205/60 R16 tyre

16" VELORUM black metallic alloy wheels 6.5J x 16" ET46 for 205/60 R16 tyre **16" TWISTER** silver alloy wheels 7J x 16" ET46 for 205/60 R16 tyre

COMPLETE WHEEL COVERS

This set of high-quality poly transport and handling.

120

SNOW CHAINS FOR 16" VELORUM ALLOY WHEELS

This set of high-quality polyester wheel covers enables easy wheel

FRONT AND REAR MUD FLAPS

They offer both protection and good looks. The front and rear mud flaps from ŠKODA Genuine Accessories prevent your car's bodywork from getting dirty or being damaged by mud, snow, gravel or flying debris. And they also perfectly match the car's design.

ŠKODA CARE PRODUCTS

Since ŠKODA wants to stay by your side many years after your purchase and help you with all the situations which may occur during the car's lifetime, ŠKODA Care products were developed. ŠKODA Care products keep you mobile, provide maximum possible comfort, safety, and good value for money.

ŠKODA INSURANCE

Nobody knows your ŠKODA quite like the people who made it, which is why we can always offer the best cover for you and your car. ŠKODA Insurance is a member of the ŠKODA AUTO branded product family. It is a comprehensive car insurance that offers even greater comfort to our clients in case of unexpected events.

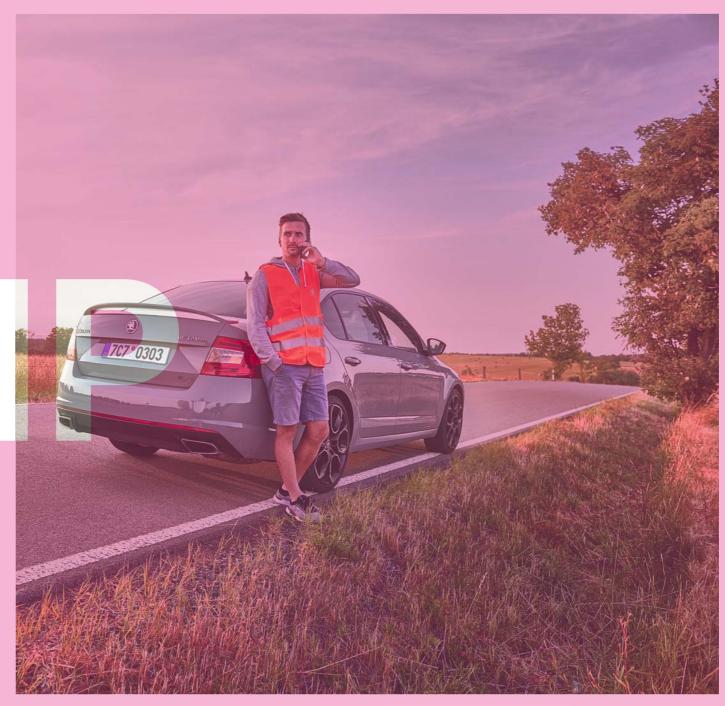

ŠKODA EXTENDED WARRANTY

Quality and reliability are key reasons why you would opt to drive a ŠKODA. They not only apply to a new ŠKODA car, but also to ŠKODA service. Extend your driving pleasure from 2 years up to 5 years or 150,000 km with the ŠKODA manufacturer extended warranty and protect yourself from any unexpected repair costs. Your standard benefits with ŠKODA extended warranty:

- Expect no exceptions. ŠKODA extended warranty is similar to the 2-year manufacturer's warranty. Repair is carried out exclusively at a ŠKODA Service Partner
- You can be sure that only the latest technical information and processes are used
- Use of ŠKODA Genuine Parts during repair is ensured
- When trading in your car, you can expect a higher value

ŠKODA SERVICE AND MAINTENANCE PACKAGES

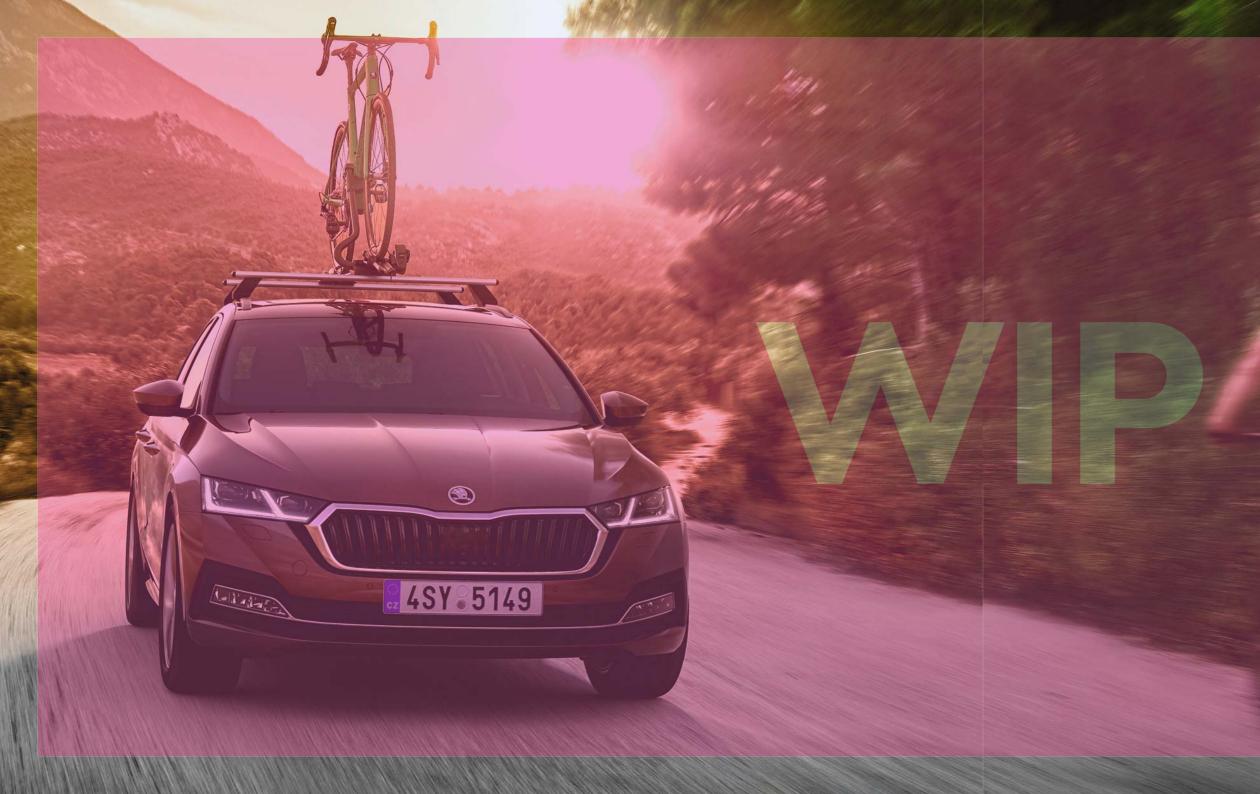

ŠKODA service and maintenance packages are specifically designed for customers who want to keep their car in prime condition, and as immaculate as the day they bought it. It is a good way to not only keep your ŠKODA running smoothly and safely, but also helps you invest in its future value and protect yourself from unexpected costs or inflation. Service and maintenance packages use only genuine ŠKODA approved parts and specialist ŠKODA trained technicians, so you know your car is in the hands of experts.

ŠKODA MOBILITY WARRANTY

Sometimes, unforeseen circumstances can arise and in the unlikely event of a breakdown, you may need assistance with your vehicle. ŠKODA Mobility Warranty gives you the assurance that you will reach your destination, even if your vehicle breaks down. In the event of a vehicle breakdown, you can call our roadside assistance service, ŠKODA Assistance, which will give you the best possible advice and professional help. It is operational 24 hours a day, 365 days a year. ŠKODA Assistance provides the following services*:

- Guided help on the phone
- On-the-spot breakdown assistance
- Towing service to the nearest ŠKODA Service Partner, incl. transportation of passengers, if breakdown cannot be rectified on the spot
- High-priority repair at a ŠKODA Service Partner
- If the repair cannot be provided on the day of breakdown, the ŠKODA Service Partner or ŠKODA Assistance will provide the following options:
 a) Courtesy car for 3 working days max.
 b) Overnight stay for passengers for 1 night c) Alternative transportation (train or bus, or also taxi in cities)

* According to equipment.

** The car can be equipped with a set of all-season 17" tyres. For more information contact your authorised ŠKODA partner. The diesel engines use Selective Catalytic Reduction. This system injects AdBlue® to reduce mono-nitrogen oxides (NO_x). The volume of the AdBlue® tank is 12 I and consumption depends on the driving style.
